

Groundbreaking personalized Spanish literacy instruction

Boost Lectura is a program based on the Science of Reading built to accelerate literacy in Spanish. Using captivating storylines and the latest research on how Spanish literacy develops, Boost Lectura engages students in powerful and personalized digital reading instruction.

Powerful and authentic content that focuses on key accelerants of Spanish literacy

Boost Lectura was built in partnership with Spanish literacy experts and educators, and the scope and sequence is true to Spanish literacy development.

The program includes:

- Highly adaptive technology that creates individual skill maps and unique game experiences for each student.
- A scope and sequence of foundational skills based on the Science of Reading for Spanish literacy development.
- Sustained focus on vocabulary, comprehension, and application of skills to authentic texts.

Reading

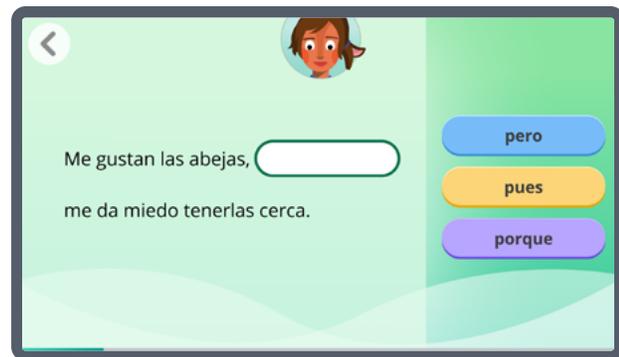

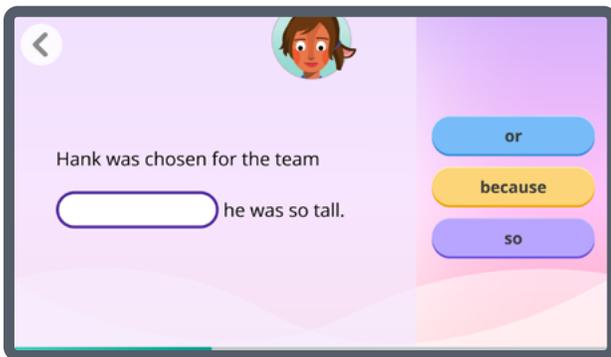

Easy, flexible implementation

Boost Lectura can be used on its own, or integrated into any dual language or English instruction model when paired with Boost Reading for biliteracy development.

Instructional parity that fosters biliteracy

When paired, Boost Reading and Boost Lectura support the transfer of critical literacy skills between languages. It is the first personalized learning solution built on the Science of Reading for Spanish and English biliteracy development.

Students have the opportunity to practice reading comprehension in both Boost Reading (left) and Boost Lectura (right).

A complete biliteracy suite

Boost Lectura joins **Amplify Caminos** and **mCLASS® Lectura** to offer a comprehensive biliteracy suite, providing core curriculum, assessment, and personalized practice in Spanish and English literacy for emergent bilinguals.
